

Name/Title: Jump Rope Ladder

Purpose of Event: The students will use skill progressions to improve their individual jump rope skills.

Prerequisites: Students should already be able to perform basic jump roping.

Suggested Grade Level: 3-5

Materials Needed: Proper Size Jump Rope for Each Student Created JUMP ROPE LADDER poster made with 3 sets of posterboard. Tape, Markers, Yardstick, Laminator Printed Visual of SPARK Individual Jump Rope Skills. or Jump Rope cards from the American Heart Association. You could also put a couple of skills at each level so the students could choose which one they wanted to perform. [Click here to see photos of the ladder in action](#)

Description of Idea

Begin class by having students pick the jump rope that is the appropriate size. Have all students gather their jump rope and give them a minute or two free time to jump while you sort out the students.

Blow whistle and have students sit in front of the Jump Rope Ladder. Explain to them that a skill progression challenge means something starts easy and gets harder as your practice. The Jump Rope Ladder starts at the bottom, just like how you would if you were climbing a ladder. Each step on the ladder gets harder. The bottom is the easiest and the top is the hardest. Each step of the ladder also includes a picture that indicates the maneuver for that level. In order to complete a level you must do the skill at least 5 times.

When I say go, you will have the entire class to try and complete the ladder. Make sure you start at the bottom. If you are not sure what to do first look at the picture, then ask a friend, and finally ask the teacher.

Before allowing them to practice go over a few safety rules.

1. Only use the jump rope for jumping
2. Use extra personal space
3. Do not jump near the jump rope ladder poster as other students will want to access it.
4. If you wish to change your rope that is fine as long as you return the old one.

Teachers:

As students are jumping, walk around and give feedback. Ask them their level etc. This is a very hands-off type of teaching. Most of the work is in creating an elaborate poster with the pictures and the steps arranged.

I have arranged mine in the following steps.

- 1 Forwards Jump- Jump Over Forwards
- 2 Double Bounce- Two Bounces Before One Jump
- 3 Single Bounce- One Bounce and Jump
- 4 Hop- On one foot
- 5 Backwards Jump- Self Explanatory
- 6 Jog & Jump- ""
- 7 Hot Peppers- Jump as fast as you can
- 8 Side Swing- Swing rope out wide and then jump
- 9 Straddle- Jump with feet out wide
- 10 Twister- Twist body when jumping
- 11 Skier- Jump side to side over a line when jumping
- 12 Bell- Jump front to back
- 13 Heel Taps- Alternate heel taps while jumping
- 14 Rocker- Body like a rocking chair
- 15 Hopscotch- Single, Straddle, Single, Straddle
- 16 The X- Criss cross legs when jumping
- 17 Crossovers- Cross arms when jumping
- 18 Double Unders- Rope passes under twice to one jump.

On occasion students will complete the Jump Rope Ladder. Have them continue to practice. This also serves as a great substitute lesson plan.

Video (YouTube)

Assessment Ideas:

Ask students where they began and ended.

Assign a goal for students to achieve and a window of time for a grade.

Review what a skill progression is.

Have a student explain to a partner or the teacher what the Jump Rope Ladder is.

Adaptations for Students with Disabilities:

Allow those students to use skipping sticks, to shadow the movement.

Use a long jump rope with disabilities student being turner or jumper.
