Repeat all of the chorus combinations 2x through. End the song by repeating chorus combination #3 two extra times.

**Assessment Ideas:**

Allow plenty of practice time so students feel comfortable and challenge them to do the dance all the way through with minimal or no mistakes. During the rapping/talking part of the song let
the students choreograph their own movements.

**Teaching Suggestions:**

Feel free to change these combinations to make them easier or add to them to make them more challenging. Students can be encouraged to add their own variations and style. Younger students can be taught fewer of the combinations and allowed to repeat them more times.

**Adaptations for Students with Disabilities:**

Adaptations for children in wheelchairs: Almost all of the movements can be done with arms only. Encourage the children to try and stay with the rhythm and have fun with the movements.
