**Name/Title:** Baby Shark Cardio Drumming

**Purpose of Event:** To have students practice rhythm while maintaining a steady beat.

**Prerequisites:** I usually complete a rhythm lesson with just the drumsticks on the floor first. This is where I teach safety while using drumsticks on the floor.

**Suggested Grade Level:** K-2

**Materials Needed:**

* One stability ball and base for each student.
* One base, 5 gallon bucket, laundry basket, or similar for the ball to sit on.
* Set of drumsticks, or lummi sticks for each student.
* Music
* [Written Routine Steps](PDF)

**Description of Idea**

I teach a cardio drumming unit once a year; however, once the routine is taught it can be used as a warm up throughout the year. Can be used for grades 3-5 as well.

To teach the actual routine we usually sit in a circle and I teach the students the routine while they are sitting. This allows me to help any of the students are are struggling. This is where I also teach the students rhythm and how to count. I only do this at the start of the cardio drumming routine. I use this [dance steps handout](#).

Below is a video of my kindergarten students performing the routine.

In addition, here is [blog](#) I wrote about this routine.

**Teaching Suggestions:**

I have taught numerous cardio drumming routines. I found it works best if "You", the teacher, teach the routine instead of showing the kids video. Keep the routine notes and/or videos next to you as you teach if needed.

Beach balls are a cheaper alternative to stability balls. In addition, you can cut a pool noodle into fourths and use these as drum sticks. If you have any students that have problems with keeping their hands to themselves, the noodle option is a solution to this issue. The third, fourth and fifth grade students loved to perform this routine as a warm-up.
