

Name/Title: Roll or Attendance

Purpose of Event: The purpose is to add a little more meaning to taking attendance. Traditionally, we have children stand on numbers. I have simply added to this.

Prerequisites: At the beginning of the school year I have the students stand on a number that corresponds to their last name (alphabetical order), and as we stretch, I ask where number 3 or number 30, etc., is if there is no student on those numbers.

Suggested Grade Level: 6-12

Materials Needed: Asphalt paint.

Description of Idea

I have lots of blacktop that is not being used so I decided to use different areas to add to my roll taking variations. I have the numbers painted; then I painted the alphabet. Thereafter, I painted the periodic table of the elements and assigned each student in each period an element. (C, H, AU, etc.) Then I painted out a keyboard and assigned each student a letter, punctuation mark or symbol. (By this time I have fairly good idea who would be an asterisk, question mark or exclamation.) The numbers and alphabet are three feet apart. The keyboard is two-foot squares but the elements are four foot blocks.

Assessment Ideas:

I am always surprised when I ask where "Hydrogen" is and a little voice replies, "Oh, he's not here today!" Although I have not actually done anything but take roll, I can imagine getting into groups by forming molecules. I have taught prime numbers with the roll numbers and vowels and consonants with the alphabet. I have had the "home keys" take off on a lap and had the rest of the class chase them.

Adaptations for Students with Disabilities:

Though I have not had children with disabilities since I repainted the blacktop, I can place students in wheelchairs in the space bar of the keyboard and put wheelchairs on the outside numbers or alpha spots.
