Students' use of time coding form

Teacher: Mark  Coder: Christine

Date: 12/20  # of students: 29  over 50% of students: 14

Time analysis codes: Decision is based on what 51% of the observed students are doing at the time.

M = Management: Time when most students (over 50%) are not receiving instruction or involved in lesson activity (e.g., changing activities, getting out or putting away equipment, listening to behavior rules or reminder).

A = Activity: Time when most students (over 50%) are involved in physical movement (e.g., catching a ball, throwing at a target, running).

I = Instruction: Time when most students (over 50%) are receiving information about how to move or perform a skill (e.g., how to move using all the space, watching a demonstration, listening to instructions).

W = Waiting: Time when most students (over 50%) are not involved in the other categories (e.g., group activity but only one or two are participating, waiting for a turn, off-task behavior, waiting for the teacher to give directions).

\[
\begin{align*}
\text{Percent of M time} & = \frac{120}{1,620 \times 100} = 7.41 \% \\
\text{Percent of A time} & = \frac{1140}{1,620 \times 100} = 7.02 \% \\
\text{Percent of I time} & = \frac{235}{1,620 \times 100} = 14.59 \% \\
\text{Percent of W time} & = \frac{37}{1,620 \times 100} = 2.28 \%
\end{align*}
\]
